Cultivating empathy, with jokes in my pocket.

Countless different jobs behind me, a few plants at home, and a well-stamped passport. I lived in three different countries before moving back to Italy, but I did manage to swim in all three swimmable oceans — the other two are just too cold. An improviser of jokes and journeys, I've put down roots in the digital world while keeping a strong sensitivity — people tell me about it often — toward others and myself, with a wink toward poetry and photography. These days I'm trying to connect the dots in software development, applying the same logic chess requires. I play looking for the brilliant move.

Experience SELECTED · MOST RECENT FIRST

2026 – present

Turin / Remote

UX Researcher & Product Strategist · Independent product discovery

- Flipped ideation to **research-first**: mapped behavioural needs on Miro, classified by severity and prevalence, before any idea.
- Validated with **7 target-user interviews** + competitor flow analysis; Value Proposition Canvas & a Value/Effort matrix narrowed **17 concepts to 1**.
- Now validating a **high-fidelity Figma prototype** (Probabilistic PoC) against pre-set thresholds — >8% onboarding, >2% pre-order — behaviours, not opinions.

2024 – present

Turin / Remote

UX/UI Designer & Developer · Digital CV — self-initiated open-source project

- Research-led: defined the **3 real readers** (recruiter, CTO, art director) and their 3-second needs; every choice defensible in an interview.
- Designed a **knolling information architecture** — one profile, four lenses — and a **WCAG-AA design system** (tokens, square/glow skill levels, reduced-motion).
- Built it AI-augmented (Copilot, Claude) with **>80% test coverage**; the live site is the proof of the workflow it claims.

2019 – present

Turin, Italy

Design System Developer (UX/UI) · ALTEN Italia @ Aruba & Intesa San Paolo

- Built a **100+ component library** in Lit **with the design team**, every component honouring the typography, spacing and states defined in Figma.
- Defended visual consistency and component states in code reviews across a **30+ person team**; **3+ years** as Tech Lead & Scrum Master of the Aruba Design System.
- Enterprise Angular for Intesa San Paolo (50+ people); introduced systematic testing (Jest), improving release stability.

2023 – 2024

Italy / Remote

Digital Strategist · Music Agency

- Designed a content strategy aimed at the industry, not a generic audience; **doubled a targeted following** (musicians, labels, promoters) organically.
- Conceived a playlist as a networking channel; organised a live event end-to-end (booking to communications).
