

GIULIO OCCHIPINTI

Digital Innovation Consultant & Technical Partner
for businesses of all sizes

PROFILE

I support businesses of all sizes across three integrated pillars: Design (UX/UI, IBM and SkillUp certifications), Technology (Angular, Lit, MCP, Node.js) and Method (lean Agile, short sprints, team autonomy). I have designed and built web interfaces for over 6 years in enterprise contexts (Intesa San Paolo, Aruba, Rai Pubblicità). I choose the tool based on the problem and I have worked in 5 countries. I don't deliver slide decks: I get inside the business, understand the real problem, build the solution and run it.
